DETAILED ACTION

Response to Amendment

As per the Office Action mailed 10/13/2009:

The rejection of claims 1-11 under 35 USC 101 is hereby withdrawn in view of Applicant's cancellation of claims 1, 6, 8-11 and amendment of claims 2-5, 7.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with SMITH, KRISTIN, Attorney for Applicant on 12/ 9/2009.

The application has been amended as follows:

Please amend step (f) of claim 46 as follows:

"f) repeating step (~~de~~) above on the second dimension of data to create a third dimension of data, and repeating step (~~de~~) on subsequently generated dimensions of data until the target number of dimensions of data has been created;"

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

As per claim 46, the primary reason for the indication of allowable subject matter is the recitation of the following limitations in the combination as recited and not found in the closest prior art available of record:

c) entering into the computer a plurality of matching criteria, wherein each criterion is user-generated or machine-generated;

d) the computer analyzing the first dimension of data based on the matching criteria to determine a target number of dimensions of data;

e) for each medical record in the first dimension of data, using a computer to:

i) identify data in each data field of the medical record being analyzed;

ii) compare the data in each data field of the medical record being analyzed with data in each field of the other medical records of the first dimension of data;

iii) determine if the comparison of step (ii) above meets at least one of the matching criteria;

iv) linking the two medical records together based on the result of step (iii) above;

v) storing the linked medical records as a single medical record in a second dimension of data;

f) repeating step (d) above on the second dimension of data to create a third dimension of data, and repeating step (d) on subsequently generated dimensions of data until the target number of dimensions of data has been created;

The closest available prior art of record are as follows:

Streepy (20020198885) teaches organizing patient data into a multi-level data structure (Abstract and throughout); however, Streepy does not teach linking data together to form multiple levels based on predetermined matching criteria.

Pedersen (Multidimensional database technology) teaches using multidimensional databases for medical data (page 45 column 1 paragraph 2); however, Pedersen does not teach linking data together to form multiple levels based on predetermined matching criteria.

A search was also conducted on foreign patents; however, no relevant art was found.

Based on the evidence presented above, Examiner submits that the closest prior art available of record do not anticipate or otherwise render obvious the claimed invention.

As per claims 2-5, 7, these claims are also found to be allowable for at least the same rationale as applied to claim 46 above, and incorporated herein.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
